

# NLCDD CATALYST LAB

CATALYST  
LABS

A collaborative space for leaders to envision, test, and make a plan to try new strategies to solve big, longstanding, and critical challenges faster and more effectively than they would on their own

## THE CATALYST LAB: WORKFORCE EDITION

February, 24-26 San Diego, CA

Presented by the National Leadership Consortium on Developmental Disabilities, in partnership with the National Alliance for Direct Support Professionals & Alvarez & Marsal

**THE WORKFORCE CHALLENGE** a sustainable workforce has been, continues to be, & will become more of a critical challenge for the IDD field. Leaders have recognized, debated, & strategized around this challenge for decades. Now is the time to come together to find new solutions & figure out how to scale up promising practices to help organizations and systems become more responsive to the needs & passions of the workforce we struggle to engage & retain.

**THE CATALYST LAB, WORKFORCE EDITION** a 2.5-day, collaborative, interactive, and solution-focused workshop-style event, will help leaders move beyond challenges to generate new ideas and creative strategies to stabilize the workforce. Leaders will come together as a network of workforce champions committed to doing differently in their organizations and systems. Leaders will leave with deeper knowledge and connections, a plan for innovation, and tools and resources needed to lead change in their organizations and systems.
